Dear Sir:

In response to the Office Action mailed May 23, 2001, please amend the above-captioned patent application as follows:

Please amend the paragraph starting at page 5, line 8 as follows:

In another embodiment, the surface regions of the semiconductor substrate beyond the collection region are barrier regions which have dopants of the first conductivity type at a concentration density larger than the concentration density of the semiconductor substrate, and the read-out electronics are formed within shielding regions. Preferably, at least part of the charge carriers that are generated in the semiconductor substrate underneath the shielding regions are collected by the collection region.

Please amend the paragraph starting at page 5, line 15 as follows:
